

HP Officejet Pro X

Introducing the HP Officejet Pro X series, the world's fastest desktop printers.

With a printhead that spans the width of a page, HP PageWide Technology simultaneously delivers four colors of Original HP pigment ink onto a moving sheet of paper. And because the paper moves while the printhead doesn't, HP Officejet Pro X multifunction and single function printers can print quietly and *fast*—up to 70 pages per minute in general office mode—at 50% less cost per page than color laser printers.

Additional HP Officejet Pro X series features include:

- Up to 50% less energy use than color lasers.
- Automatic two-sided printing to reduce waste.
- 500-sheet main paper tray for fewer printing interruptions.
- HP ePrint—print from your smartphone or tablet from virtually anywhere.

Up to twice the speed and half the printing cost of color laser printers. The HP Officejet Pro X series sets a new standard for business printing.
